### **DETAILED ACTION**

Claims 28-51 are pending.

#### ***Election/Restrictions***

Applicant's election with traverse of Group III in the reply filed on June 28, 2010, is acknowledged. The traversal is on the ground(s) that the claims have the same special technical feature. Note that claim 51, should actually be in Group I because it is dependent upon claim 28, thus, Group III encompasses claims 45-50. This is not found persuasive because claim 35 requires a supernatant of which Group III is carried out with a live probiotic and the methods of Groups I and II are directed to different methods of which one is directed to live probiotic specific strains and the other a supernatant. Further, specific PMN cells are stimulated by one Group and not the other. Thus, a reference which reads on Groups I or II will not necessarily read on Group III. However, upon the indication of allowable subject matter it is possible that the claims will be rejoined.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-44 and 51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on June 28, 2010.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1651

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Doyle et al (USP 5,965,128), cited on enclosed PTO-892 Form.

Claims are drawn to a probiotic for treating infections.

Doyle et al disclose a probiotic for treating infections, see col. 9, lines 1-15.

The claims are identical to the cited teachings and are, therefore, considered to be anticipated by the teachings therein because a probiotic is used as claimed herein and it has the same properties, therefore, it will inherent treat the same infections as claimed.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
